# Record & Playback on DVD

### Why Choose DVD

- **Easy Playback:** DVD Handycam® models record directly onto DVDs that can be played back immediately on most DVD players and PCs without any additional post-processing.
- **Easy Sharing:** Sharing your videos is easy when they're recorded on DVDs. No matter how many duplicates you make to give to friends and family, there won't ever be any loss in picture quality!
- **Long-lasting High Picture Quality:** By recording in the MPEG-2 format with variable data compression, your videos come out sharp and clear, allowing you to enjoy them over and over again for years to come.
- **Quick Access to Any Scene:** Browse what you've recorded and jump directly to the scene you want via a convenient thumbnail display that you can call up on either the LCD screen or your DVD player.
