NFC-compatible smartphones with Android™ 2.3.3 or later installed

NFC

NFC (Near Field Communication) is a technology enabling short-range wireless communication between various devices, such as smartphones and IC tags. Thanks to the NFC function, data communication - for example, BLUETOOTH pairing - can be achieved easily by simply touching NFC compatible devices together (i.e., at the N-Mark symbol or location designated on each device).

- Set the NFC function of the smartphone to on.**  
For details, refer to the operating instructions supplied with the smartphone.  
• If your smartphone OS is Android 2.3.3 or later, and less than Android 4.1: proceed to step 2.  
• If your smartphone OS is Android 4.1 or later: proceed to step 4.

- Download and install the app "NFC Easy Connect."**  
"NFC Easy Connect" is a free Android app you can download from Google Play™.  
Download the app by searching for "NFC Easy Connect" or access it by using the following two-dimensional code. Fees may be charged for downloading the app.
