BRAVIA Technology

True RGB |  RGB Backlight Master Drive Pro

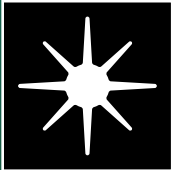

True RGB, the future of colour

Powered by a newly evolved Backlight Master Drive—built on two decades of innovation—Sony’s True RGB drives three-colour LEDs independently. It delivers unprecedented colour volume, precise colour gradation, and a significantly wider viewing angle—enhancing the movie-watching experience even further.

RGB Triluminos Max

Luminance Booster Pro

A new era of uncompromising colour accuracy

Sony unites the colour range of four flagship QD-OLED with the high brightness of Mini LED. This breakthrough enables a new level of colour volume—and the ability to render even more accurate colours.

Specifications

Smooth
Color Gradation

See the hidden depths like never before

From the brightest peak to the darkest shade, Sony's True RGB faithfully reproduces even the finest tonal details. It brings the full depth of the story vividly to life on screen.

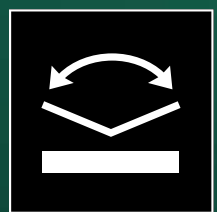

Immersive
Black Screen
Pro

Watch uninterrupted—even in daylight

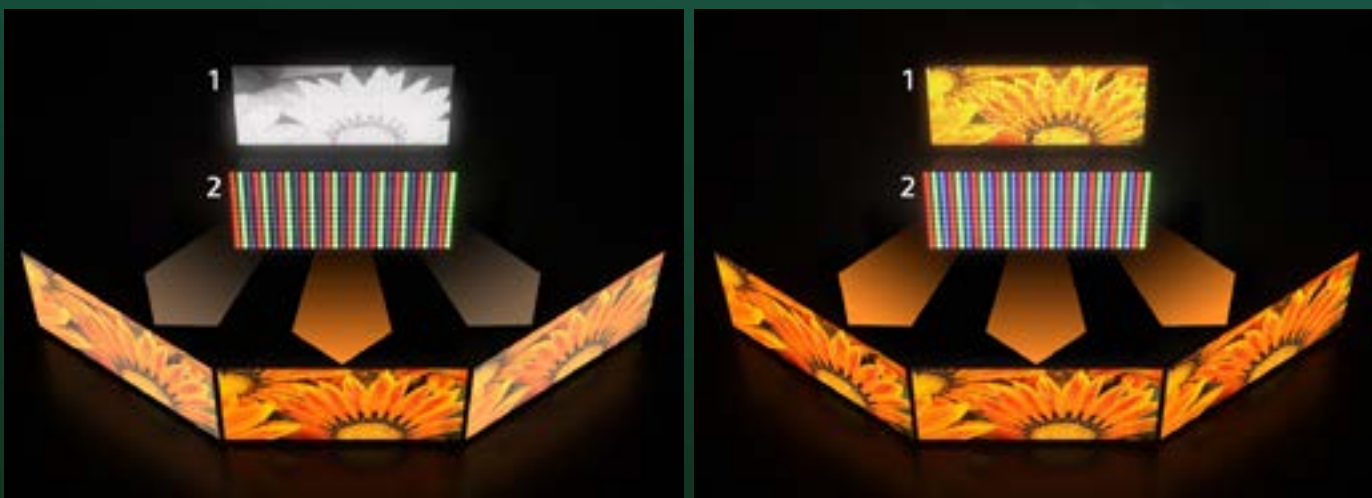

A unique screen treatment minimises light reflections and reduces on-screen glare from viewers and surrounding furniture—so you stay absorbed in the film, whatever the time of day.

X-Wide
Angle
Pro

Same stunning picture - any seat

With X-Wide Angle Pro, colour and contrast stay vivid and natural from the side as well as the front, giving the whole room a true cinema view.

Specifications

XR
Clear Image

Less noise. Less blur. More clarity in every picture.

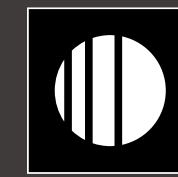

XR Clear Image improves picture clarity and reduces noise when upscaling from low-resolution content by applying specific algorithms based on the original resolution.

XR
Contrast Booster 40

Deepened Blacks & Bright Highlights

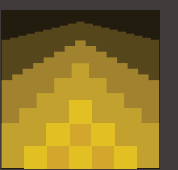

Powered by the Cognitive Processor XR, this technology adjusts brightness to create higher peaks in glare and deeper blacks in shadows, providing a highly realistic picture.

XR
Motion Clarity

Even fast-moving action stays smooth, bright and clear

Forget about blur. XR Motion Clarity™ analyses movement across several frames and precisely synchronises the backlight with on-screen motion so you see clear, bright images, however fast the action.

XR
4K
Upscaling

Recreating lost texture, the intelligent way

Our Cognitive Processor XR accesses a vast amount of data, intelligently recreating lost textures and detail for real-world pictures. See details such as naturally defined animal fur and sharply outlined rock.

Specifications

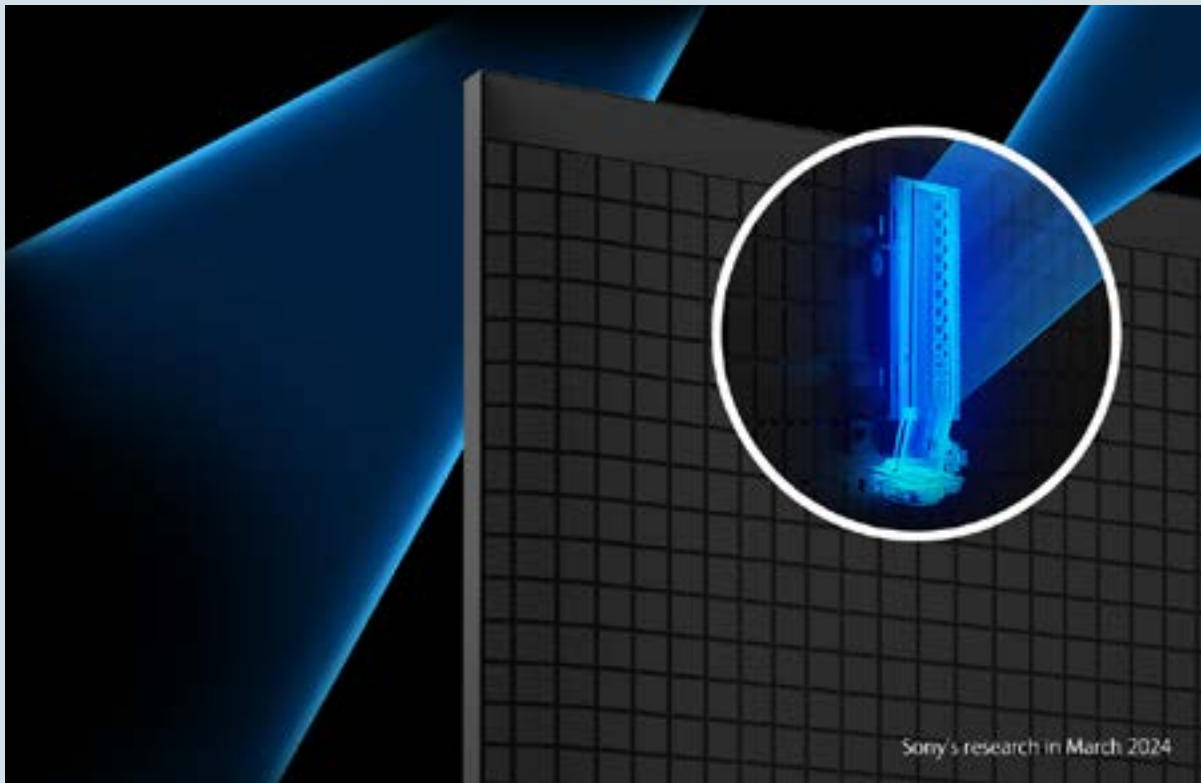

Acoustic Multi-Audio+

Cinema-like sound, perfectly matching pictures

Hear sound from exactly the right place. Not from beneath the screen but seemingly straight from the screen itself. With Acoustic Multi-Audio TM, what you see and what you hear are perfectly matched.

World’s first TV with Beam Tweeter

Unprecedented overhead surround sound with Beam Tweeter

Sound without boundaries. Our Beam Tweeter projects sound upwards, reflecting it off the ceiling so aerial effects truly appear to come from overhead. Also, our Frame Tweeter vibrates the frame, projecting immersive sound forwards.

Acoustic Surface Audio+

Screen is the speaker, pictures and sound in harmony

Acoustic Surface Audio+TM uses special actuators to turn the screen into a multi-channel speaker. You’ll hear sound that precisely matches what’s on screen with pictures and sound in total harmony for a truly immersive experience.

Specifications

X-Balanced Speaker

Powerful Sound, Zero Compromise

Experience richer, deeper, and more immersive sound with our cutting-edge X-Balanced Speaker Unit. Designed to break the limits of conventional round speakers, this innovative technology maximizes the speaker’s diaphragm area for an unparalleled audio experience.

All your entertainment upscaled to 3D surround sound

XR Surround creates surround sound from the sides and vertically so you can experience 3D audio without the need for in-ceiling or up-firing speakers.

Voice Zoom 3

Crystal clear voice. With AI technology

No more muffled voices. Our new Voice Zoom 3™ recognizes human dialogue through AI machine learning and amplifies or reduces its volume so even small dialogue sounds loud and clear. Works with our home cinema products too.

True RGB

Picture

Sound

Gaming/UX

Line-Up

Specifications

Auto-calibrated to your room for perfect sound

Your room becomes part of the sound design. BRAVIA measures space and ceiling height, then calibrates audio automatically. It delivers a perfectly balanced, cinematic experience without the setup stress.

Advanced audio technology designed to deliver incredibly realistic sound

Unlike traditional surround sound, DTS:X treats sound as individual objects. Those objects (sounds) can move in a 3D space and create an immersive experience. For example, you'll hear a helicopter flying overhead or a car zooming by with lifelike precision.

Acoustic Centre Sync

TV and soundbar in perfect harmony

The BRAVIA™ Acoustic Center Sync allows you to connect your compatible Sony soundbar/audio system to the TV for enhanced audio playback using the TV as a center channel speaker in a multi-channel setup.

Conceals cable, effortlessly

Newly designed pillars allow the stand to blend seamlessly into its surroundings with quiet sophistication. Cables are subtly integrated into the stand's design, balancing functionality with refined aesthetics and keeping the front view clean and uncluttered.
